### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following abstract has been added on a separate page following the claims:

--Apparatus, methods and kits for treating symptoms associated with common ailments such as headaches, rhinitis, asthma, epilepsy, nervous disorders and the like, are provided. The apparatus includes dispensers for carbon dioxide and other therapeutic gases. The methods include delivering small volumes of these gases to patients in a manner where the gas infuses a body region in order to bathe the mucous membranes therein. It has been found that even very short exposure of patients to small volumes and high concentrations of such gases can provide significant relief from symptoms.--.

The above amendment was made to remove legal phraseology from the abstract.

### ***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or fairly suggest the method of controlling the effect of a drug wherein the drug is administered, a flow of gaseous physiologically active agent is generated and infused to a facial orifice or exposed to mucous membranes being either nasal or

oral mucous membranes and wherein the individual inhibits the flow of the agent into the trachea and lungs by limiting inhalation of the agent; or a method of controlling the effect of nitroglycerine for treating angina or myocardial infarction where nitroglycerine is administered, an environment of carbon dioxide in greater concentration than found in exhaled breath is created and exposed to mucous membrane of either a nasal or oral mucous membrane and preventing the entry of carbon dioxide gas into the trachea and lung; or the method of generating a flow of NO, infusing a facial orifice with the NO, creating an environment of carbon dioxide in a higher concentration than that found in exhaled breath and exposing either a nasal or oral mucous membrane with the carbon dioxide to enhance the action of the NO and preventing entry of the carbon dioxide into the trachea and lung.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K Dawson whose telephone number is 703-308-4304. The examiner can normally be reached on M-Th 7:30-5:00.
